

Lacquered cheese foil/ Cheese Packaging Aluminum Foil

With an emphasis on product performance and consumer safety, Haomei offers a perfect solution concerning packaging of molten cheese. Haomei lacquered cheese foils are coated with primer, protective and heat seal lacquers, providing excellent sealing properties to the aluminium foil.

Application : used for pack processal cheese, Surface in contact with cheese directly. Shell & lid foil, together to achieve triangle & square packaging.

Specifications Cheese wrapping aluminium foil

- **Aluminum foil 8011** O in soft temper, 10-16micron, Width from 50mm to 300mm
- Shell aluminum foil & lid aluminum foil
- With printing or protect primer & sealing lacquer
- One side : NC primer coating or coating gold color. Other side : heat seal lacquer with low melting point 70 degree

Advantages of Cheese Packaging Foil

- High corrosion resistance
- Low temperature sealing
- Excellent barrier against light, vapor and oxygen
- Flexible on the thickness, width and printing design
- Vertically integrated production process
- Multilayer lacquering process
- Excellent, machinability and sealability
- Certified for direct contact with molten cheese
- Recyclable
