

## Product Specifications of PET lids

PET lids with sealing media, Thickness of PET is 60 micron, Lids have embossing of dots.

Temper	Half hard , Hard
Foil Alloy (model)	AA 8011, AA 8079
Type	Roll, Sheet
Treatment	Coated, Composited

### Product description PET lids:

Aluminum foil PET Lids is used to seal the opening on plastic jar as well as acting as a very effective tamper-proof lid . The aluminium foil die cut lids prevents the product from deterioration & pilferage during distribution and storage. They can be crimped over the top of the container, more frequently, heat sealed to provide a more secure closure & sealing system. Aluminium foil lids acts as secure seals for sealing for your valuable products packed.

### Applications

- Beverages
- Cosmetics
- Curd
- Flavoured Drinks
- Food Stuffs
- Powders
- Yogurt

### Common Structures

- Poly Coated Aluminium Foils
- HSL Coated Aluminium Foils
- PS Lacquer Coated Aluminium Foils
- PP Lacquer Coated Aluminium Foils
- Alu / Heat Sealing Lacquer
- PET / Alu / Heat Sealing Lacquer

- Alu / Heat Sealing Film
- PET / Alu / Heat Sealing Film
- PET / Foam / PET / Alu / Sealing Film

## **Product Features**

- Aluminium Foil Lids for plastic containers of HDPE/PP/PET/PS
- Multi -Colour Printing up to 8 Colours
- Embossed
- Prevent costly leaks and volatilization
- Excellent puncture resistance
- Metal free – metal detection passable, microwaveable
- Reduce the risk of tampering, pilferage, and contamination
- Extend shelf life
- Create hermetic seals
