

Colored Aluminum Foil | Coloured Aluminium Foil | Haomei

Haomei high quality food grade [colored aluminium foil](#) 8011 3003 could be used for production of semi-rigid containers and lids for food packaging. Due to its excellent thermal conductivity properties, coated aluminium foil food container is ideal for the reduction of cooking, cooling and heating. Color lacquered aluminium foil provides high barrier protection against light, gas and contamination, that improves the food conservation. With the colour coated aluminium foil lid, the food could be heated in air furnaces and ensure the preservation of an optimum temperature and a good state of food longer, being light weight and resistant to external agents at the same time.

Haomei Aluminum is a professional high-quality aluminum foil package manufacturer. With the advanced technique from Germany, ABL has become one of the largest colored aluminum foil baking packaging producer and exporter in China. As the industry leader equipped with the worlds leading full-automatic production line, we are granted The National Aluminum Food Safety Packaging Materials Certificate, ISO 9001:2000 certificate, US FDA Certificate, and European Union SGS Certificate. ABL Baking Pack promises to provide our customers with professional recommendations and services, use harmless, pollution-free and renewable materials, and emphasize on food safety and overall quality.

Specifications of colored Aluminum Foil

| | |
|--------------------|---|
| Product Name | color coated aluminum foil for container |
| Alloy | 8011 3003 |
| Temper | O H12 H22 H14 H24 |
| Thickness | 40mic-150mic |
| Width | 100mm-1300mm |
| Length | as the customer's request |
| Core | Aluminium/Steel/Paper |
| Coating lacquer | Colorless or white lacquer on one side, and plain, colorless, white, coloured lacquered or printing on the other side, lubrication is optional. |
| Coating properties | Epoxy based lacquers with excellent adhesion to aluminium foil(resistant to adhesive tape test), good solvent resistance, good friction resistance and good resistance to dry heating(2 min./240°C). Different colours available on customer request. Thickness of coating depends on colour. |
| Core ID | 76mm/152mm or as request |
| Core OD | as the customer's request; |
| MOQ | 3 tons |
| Delivery Time | around 25 days |
| Packing | Standard seaworthy export wooden cases/carton |

Description of coloured aluminum foil for containers

- 1, plain aluminium foil for container
- 2, lubricated aluminium container foil
- 3, lubrication as the customer's request, both sides lubricated
- 4, samples can be provided
- 5, Color lacquered aluminium foil
- 6, color: white gold blue red, etc
- 7, lacquering as the customer's request
- 8, samples can be provided for testing;

Features of colored aluminum foil for food:

1. Very good heat conductivity, that makes it suitable for freezing and re-heating.
2. Light weight that allows economizing on shortage and transport space.
3. Food can be heat by convection, fan or microwave oven.
4. Extraordinary properties for inlaying, with lacquers especially developed by our technical department for single inlay process as well as double inlay.

Our services of coloured aluminium foil for food

- 1, Reasonable production arrangement to make delivery very fast;
- 2, We are able to provide leading tolerances, metallurgical assistance, quick and reliable delivery, samples for new products, etc.
- 3, We have the strong capability to meet your particular requirement for the products.
- 4, To guarantee the quality of the products we can meet most of the standards all over the world.
